Generic Vs Branded

Branded pharmaceuticals are original drugs marketed under a trademarked name by pharmaceutical companies, typically sold at higher prices due to research, development, and marketing investments. Generic pharmaceuticals are identical copies of branded drugs, sold at lower prices once the patent expires, meeting the same safety and efficacy standards

Op System

Op System is a user-friendly application designed to efficiently manage and track the queue of patients in outpatient departments (OP) of medical facilities. It offers real-time status updates, customizable workflow, patient communication features, data analytics, and seamless integration with electronic health records (EHR). Op System enhances operational efficiency, reduces waiting times, and improves the overall outpatient experience.

Patient Rights & Responsibilities

Patient Rights:

- **Right to Information:** Patients have the right to be informed about their medical condition, treatment options, and potential risks.
- **Right to Privacy and Confidentiality:** Medical information and records must be kept confidential, and patients have the right to privacy during examinations and discussions.
- **Informed Consent:** Patients have the right to be fully informed about the risks and benefits of any medical procedure and to give their consent before treatment.
- **Dignity and Respect:** Patients should be treated with dignity and respect, regardless of their background, beliefs, or condition.
- **Access to Medical Records:** Patients have the right to access their medical records and request copies for their own records.
- **Second Opinion:** Patients can seek a second opinion from another healthcare professional to ensure a comprehensive understanding of their diagnosis and treatment options.
- **Complaints and Grievances:** Patients have the right to file complaints or grievances against healthcare providers and facilities if they feel their rights have been violated.

Patient Responsibilities:

- **Providing Accurate Information:** Patients should provide accurate and complete information about their medical history, symptoms, and lifestyle to facilitate proper diagnosis and treatment.
- **Adherence to Treatment Plans:** Patients are responsible for following prescribed treatment plans, medications, and lifestyle changes recommended by healthcare providers.
- **Respect for Healthcare Providers:** Patients should treat healthcare providers and staff with respect and courtesy, recognizing the challenges they face in delivering quality care.
- **Participation in Decision-Making:** Actively participating in decisions about their healthcare, including discussing treatment options and expressing preferences.
- **Follow Hospital Policies:** Adhering to the policies and rules of the healthcare facility, including timely payment of bills and following visitation rules.
- **Reporting Changes in Condition:** Patients should promptly report any changes in their condition or unexpected side effects of medication to their healthcare providers.
- **Understanding Financial Obligations:** Being aware of and fulfilling financial obligations related to healthcare services, including payment of bills and understanding insurance coverage.
- **Health Promotion:** Taking steps to maintain their own health and prevent illness, including adopting a healthy lifestyle and participating in preventive care measures.

Equipments

Treatments & Expenditure

Disease	Description	Cost
CABG (Coronary Artery Bypass Grafting)	It is done where the blood vessels that supply the heart muscle (coronary arteries) become narrowed or blocked.	2.87 lakhs
Heart Valve	Heart valve surgery is a medical procedure that repairs or replaces malfunctioning heart valves to restore proper blood flow and improve cardiac function.	5.2-5.98 lakhs
Brain tumor surgery	Brain tumor surgery is a medical procedure that involves the removal or treatment of abnormal growths within the brain to address tumors and restore neurological function.	2.1-2.36 lakhs
Craniotomy	This approach commonly treats brain tumors, aneurysms, arterio-venous malformations, subdural empyemas, hematomas, and other cerebral conditions.	5.5-6 lakhs
Ureteroscopy	Ureteroscopy is a minimally invasive surgical procedure for the diagnosis and treatment of kidney or ureteral issues, using a thin, flexible tube (ureteroscope) inserted through the urinary tract.	90k-120k
PCNL (Percutaneous Nephrolithotomy)	PCNL is a minimally invasive surgery to remove kidney stones using a small access tract through the skin, allowing for stone extraction and fragmentation.	1-1.3 lakhs
Cataract surgery	Cataract surgery is a common and effective procedure involving the removal of the cloudy lens and replacement with an artificial lens to restore clear vision.	1-1.3 lakhs
Cataract		25k-32k
Glaucoma	Glaucoma surgery involves various procedures designed to reduce intraocular pressure and manage glaucoma, a progressive eye condition that can lead to optic nerve damage and vision loss.	35k-40k

General Test Costs

Test	Cost
------	------

Basic Blood Test	500
ECG (or) EKG	600
Cardiac catheterization	25000
Coronary Angiogram	14000
MRI(Magnetic Reasonance Imaging)	8000
CT Scan(Computed Tomography)	6000
Lumbar Puncture(Spinal Test)	2000
BUN	200
Urinalysis	300
Optical Coherence Tomography(OCT)	3000

Dr. Priya Patel, MD
Cardiologist with 4 Years of Experience

About Me

I am a dedicated and experienced cardiologist committed to providing exceptional cardiac care. With four years of practical experience, I have successfully diagnosed and treated a wide range of cardiovascular conditions.

Education

Doctor of Medicine (MD) in Cardiology - Chennai Medical College, 2016
Bachelor of Medicine, Bachelor of Surgery (MBBS) - Chennai Medical College, 2012

Certification

Board Certified in Cardiology
Advanced Cardiovascular Life Support (ACLS) Certification

Professional Experience

Cardiologist at Napollo Hospitals, Chennai, 2018 - Present
Assistant Cardiologist at Tamil Nadu Heart Institute, Coimbatore, 2016 - 2018

Specializations

Diagnosis and treatment of coronary artery disease
Management of heart failure
Interventional cardiology procedures
Cardiovascular risk assessment and prevention

Services Offered

Comprehensive cardiac evaluations
Echocardiography and stress testing
Coronary angioplasty and stent placement
Heart rhythm management
Lifestyle and dietary counseling for heart health

Patient Testimonials

Dr. Patel is not only knowledgeable but also compassionate. Her thorough explanations and caring approach made me feel confident in her care. - Ramesh Kumar
I appreciate Dr. Priya's attention to detail and her genuine concern for her patients' well-being. Highly recommended! - Anjali Sharma

Generic VS Branded

Overpriced Branded Medicine

Doctors often prescribe branded medicines that are 80% more costly than generic ones due to collaboration with pharmacy companies.

These collaborations lead to claims that "Generic won't work effectively and only this medicine works", resulting in higher profits.

Generic medicines are often as effective as branded ones, containing the same molecular formula.

Patent Rights and Generic Medicines

Pharmacy companies have 20 years of patent rights, after which their medicines become generic, leading to decreased prices.

Despite passing all tests and having the same molecular formula, branded medicines remain unregulated in cost.

Internal Scams in Generic Medicines

Generic medicines often have inflated prices by 50% - 80% of the MRP, contributing to seller profits.

Rumors like "Generic medicines won't work efficiently" are spread by pharmacy companies to maintain their business.

Government Initiatives

The Indian government has launched "Jan Aushadhi," with 5000 generic medical shops, providing affordable healthcare.

Example

Metformin, a generic diabetes drug, costs 40 rupees per box of 10 tablets, while the branded Glucophage costs 179 rupees, showing a 77.65% price difference.

Availability of Brands

More than 1,00,000 brands of drugs are available in India, leading to a wide variation in prices.
